### Tools Required:
- Power Drill
- Safety Glasses
- Tape Measure
- 3/16" & 5/32" Allen Wrenches
- Level
- Pencil
- Center Punch
- #2 and #3 Phillips Screw Drivers
- Combination Square
!!!CHECK BEFORE STARTING!!!

Wide Stile (Surface Strike)
Minimum door stile 4-1/2" (114 mm).
Template drawings provide door and frame structural and dimensional specifications for door and frame preparation.

Narrow Stile
Minimum door stile 2" (51 mm)

Doors and frames with walls having a structural thickness (metal skin plus reinforcement, or solid wood) to engage less than (3) full screw threads, are considered unreinforced for hardware.

Unreinforced Doors: Use Sex Nuts and Bolts
Unreinforced Frames: Use Blind Rivet Nuts (see sketch)
Fasteners for unreinforced openings are not supplied by Detex.

Reinforced door or frame engages at least (3) screw threads.

Blind Rivet Nut

Door Must Swing Freely
Door Must Not be Warped
Door Must Not Bind
Door Must Not Sag

NOTE: 750mm MAXIMUM DOOR WIDTH OPENING FOR EUROPE FOR 36" DEVICE
1000mm MAXIMUM DOOR WIDTH OPENING FOR EUROPE FOR 48" DEVICE
THE SAFETY FEATURES OF THIS PRODUCT ARE ESSENTIAL TO IT'S COMPLIANCE WITH EN 1125.
NO MODIFICATION OF ANY KIND, OTHER THAN THOSE DESCRIBED IN THESE INSTRUCTIONS ARE PERMITTED.

WHEN PLACING EXIT DEVICES ON EXISTING DOORS, DETEX OFFERS SVR REINFORCEMENT KIT #101063 TO STRENGTHEN THE TOP & BOTTOM BOLT INSTALLATION

NOTE: LOCAL CODES MAY REQUIRE THROUGH BOLTING. SEX NUTS ARE NOT INCLUDED WITH THIS DEVICE. SEX NUTS CAN BE PURCHASED SEPARATELY.
Detex provides optional kits for Advantex, see last page.
Slide centercase mounting plate in place on centercase locator.

FIG. 2
NOTES:
Centercase mounting plate & locator packed in carton next to device.

1-1/2" to edge of door
(∗ 2" with tab)

FIG. 3A
WIDE STILE INSTALLATION
Typical Installation Min. Stile 3 1/2"

Mark 2 holes for mounting screws (1 top & 1 bottom)
Align EDGE of locator with edge of door

FIG. 3B
NARROW STILE INSTALLATION (NS)
Aluminum Door Min. Stile 2"

Mark 2 holes for mounting screws (1 top & 1 bottom)
Align INSIDE CORNER of locator with edge of door

If trim is used, peel back label from cam, mark center hole for tailpiece, replace label

FIG. 3C

NOTES:
Plastic locators are provided with an extra 1/2" flap to allow better centering of the device on the stile or can be used when installing 1/2" Astragal to give equal backset from the door edge.

IF OUTSIDE TRIM IS USED, REFER TO OUTSIDE TRIM INSTRUCTIONS NOW.

Optional Sex Nuts can be used for thru-bolting the device to the door. Catalog No: SN1 (quantity 2 per order)
**FIG. 4**

WIDE STILE
Align latch/strike locator with edge of door

Frame header

Mark for 96 strike

Mark for top latch

NARROW STILE (NS)
Align arrow line with edge of door and frame header

Mark for 96 strike

Mark for top latch

Left Hand Reverse shown

**NOTE:** Do not use lockwashers.

**FIG. 5A**

NOTE: Top latch bracket, latch assembly and cover are shipped as a unit. Disassemble to obtain the respective parts for installation

Optional Sex Nuts can be used for thru-bolting the device to the door. Catalog No: SN1 (quantity 2 per order)

**NOTE:** HURRICANE rated devices MUST BE thru-bolted using either sexnuts or outside maiting trim

Install latch assembly **FIG. 5B**

10-32 x 5/16" PFHUS (both sides)
(from latch assembly)

INSTALL TOP STRIKE

Install inner screw AFTER final adjustment
(See Pg. 13 Adjustment/Troubleshooting, Note #4)

**FIG. 5C**
NOTE: IF TRO DEVICE, SKIP THIS PAGE AND CONTINUE WITH INSTALLATION

WIDE STILE
Locator placement

MARK BOTTOM BOLT HOLES

SAME LOCATOR USED FOR TOP LATCH

NARROW STILE
Locator placement

MARK BOTTOM BOLT HOLES

Align locator EDGE with door edge and locator BOTTOM with door bottom

FIG. 6

Align locator ARROWS with edge of door and locator BOTTOM with door bottom

NOTE: BOTTOM BRACKET IS NON-HANDED AND MAY BE USED FOR RHR AND LHR APPLICATIONS

FIG. 7A

NOTE: IF OPTIONAL BOTTOM BOLT GUARD WILL BE USED, AN ADDITIONAL MOUNTING BRACKET IS REQUIRED. SEE BOTTOM BOLT GUARD INSTALLATION INSTRUCTIONS.

FIG. 7B

NOTE: Do not use lockwashers.

Optional Sex Nuts can be used for thru-bolting the device to the door. Catalog No: SN1 (quantity 2 per order)

NOTE: HURRICANE rated devices MUST BE thru-bolted using either sexnus or outside mating trim
AFTER POSITIONING DEVICE AGAINST DOOR, INSTALL 1/4-20 x 1/4" PPH SCREWS. CAUTION: MUST INSTALL TO SECURE CENTERCASE. NOTE: FAILURE TO INSTALL VOIDS WARRANTY

Be sure to engage cam to tailpiece on mounting plate. Note the position of the cam.

Depress pushpad when installing. Insert centercase into slots of centercase mounting plate, depress pushpad, rotate toward door.

FOR 03 FUNCTION ONLY

CHECKING FOR DEVICE CLEARANCE (Cut-Off procedure if required)

1. CAUTION: Check for device and door frame clearance. If no cut-off needed, proceed to the next step.

2. Cut fillerplate and extrusion STRAIGHT & SQUARE to desired length and deburr. Secure with tape before cutting.

<table>
<thead>
<tr>
<th>Non-Electrified Minimum Fillerplate Length</th>

For further Cut-Down information, see: www.detex.com/cutdown
MORTISE CYLINDER INSTALLATION
CD (Cylinder Dogging)
(if required)

1. Slide / remove the fillerplate subassembly
2. 1/4" collar (not supplied) required for 7 pin cylinder. (Detex p/n: ECL-1595)
3. Mortise Cylinder
   with standard Yale cam required
4. Adjust for LONGER cylinder length with spacers (provided) and cylinder collar (not included)

Follow steps "a" through "g" for CD installations

a. Remove endcap and endcap mounting bracket.
b. Remove fillerplate.
c. Remove and discard shipping insert and nut.
   Loosen (2) screws from dogging assembly.
d. Install mortise cylinder (sold separately) with large hex nut provided.
e. Trial fit dogging assembly. If cylinder is too short, remove spacers as necessary and reattach them under the (2) screw heads (see above).
   Fasten the (2) screws to the rest of the assembly.
   NOTE: The key should easily turn in both directions.
f. Rotate key counterclockwise
g. Assembly complete. Continue with Panic Hardware instruction.

---

Level pushpad assembly

1. Slide fillerplate & endcap bracket into extrusion & level pushpad assembly.
   Note: Endcap Bracket must bottom-out on extrusion.
   DO NOT REMOVE NYLON SPACER ON BACK OF BRACKET!
   Secure the endcap bracket to door by tightening the factory installed self-drilling screw.

2. Mark and drill holes for endcap bracket.

3. IMPORTANT:
   Install (2)
   6-32 FH screws
   for added security

   #14 x 1"
   1/4-20 x 1"
   #14 x 1-1/4" SMS

6-32 x 3/8" PFHU
CORRECT HANDLING OF DEVICE
NOTE: LINK SHOULD ALWAYS BE IN TOP POSITION

Right Hand Reverse (RHR)

NOTE: If removed, be sure to replace screws after adjustment. These screws MUST be used.

NOTE HANDING INDICATOR ON CENTER LIFT

LINK

Left Hand Reverse (LHR)

1/4 20 x 1/4" Screws
P/N 101621-5

NOTE: If removed, be sure to replace screws after adjustment. These screws MUST be used.

FIG. 8A

NOTE:
If link is not in uppermost position on the centerlift, carefully remove "E" clips and reposition link on top pin of the centerlift and replace "E" clips. (An additional "E" clip is provided on opposite link pin.)

Verify carriage moves up and down smoothly when pushpad is depressed and released.

TOP ROD INSTALLATION

1. Top rod may require cutting if centerline of device is over 40" from finished floor, or if a non-standard frame is used.

2. To determine rod length: Undog device and measure the distance from the bottom edge of the top latch bracket to the top of the rod carriage. Add 1-3/4" for the rod length.

Insert top rod into top latch until it stops. Tighten setscrews FIRMLY

In normal latched position, rod connector block must rest on plastic bumper

1/4-20 x 1" BOLT

1/4-20 x 2" BOLT
TOP ROD INSTALLATION (CONT.)

Verify top latch bolt is in fully extended position.
Rotate bolt for rod height adjustment.
Head of bolt should drop freely into slot in carriage.

FIG. 10

TOP ROD ONLY (TRO)
ADJUSTMENT / TROUBLESHOOTING

TOP LATCH TESTING AND ADJUSTMENT

1. Close the door. The holdback lever should engage the backside of the strike, allowing the latchbolt to extend. The device should latch securely and latchbolt should fully project into the strike cavity.

2. Press the pushpad. The latchbolt should retract fully and smoothly from the strike as the door opens.

3. Release the pushpad. The latchbolt should remain retracted until the door is closed.

4. Once the latchbolt operation has been evaluated, the strike should be checked and adjusted to allow the door to be held snug to the frame but allow free movement of the latchbolt during normal operation. When the appropriate position has been set, a third hole should be marked, drilled and tapped for a #10 machine or use a #10 self drilling screw. Lock the strike in position with this third screw. (See Fig. 5C)

NOTE: For centerline heights significantly higher or lower than the recommended 40", it may be necessary to use shorter or longer adjustment hexbolts in the rods to effect appropriate adjustment. For some door heights it maybe necessary to cut the rod. Be sure to cut the un-threaded end. If this is done, we recommend rod covers be used to prevent exposed bolt threads.

TROUBLESHOOTING

1. **Latchbolt does not completely relatch when closing the door**
   - Loosen the strike screws and adjust the strike to allow the latchbolt to completely extend into the strike.
   - Tighten the screws and add the third center screw to lock the strike in place.

2. **Latchbolt fails to retract when pushpad is pushed**
   - Check centercase assembly and verify that the link is attached to the TOP post of the centerlift assembly (see Fig. 8A), or shorten top rod by rotating bolt. Relock bolt into carriage.

3. **Latchbolt is slow or does not completely extend when door closes.**
   - Check rod adjustment (Fig 10).
   - Check centercase, verify that the 1/4-20 x 1/4" screws have been installed (See Fig. 8A).
NOTE: IF TRO DEVICE, SKIP THIS PAGE AND CONTINUE TO PAGE 15

FIG. 10B - Detail

To establish bottom rod length, measure the distance from the slot in the carriage to the floor or threshold (XX") and add 5/8".

FIG. 10B

Thread 1/4-20 X 1" hexbolt into rod a MINIMUM of 1/2"

Insert rod into bottom bolt.

Align holes in rod and bolt that will result in overall length closest to dimension needed.

Adjust threaded hexbolt at opposite end of rod for fine adjustment of length.

Mark location on rod where it meets the bolt and/or tape bolt in position.

XX + 5/8" Example
Place bottom bolt and rod assembly into bottom bracket. Slide the pin through the slot of the bracket through the bolt and rod assembly. Insert pin clip. Use 1/4 x 20 bolt at top of rod to obtain final adjustment. When properly adjusted, pin will be located at or near the index mark on the bracket.

INDEX MARK FOR 3/4" FROM FLOOR TO BOTTOM OF DOOR (UNDERCUT) & THRESHOLD

INDEX MARK FOR 1/8" UNDERCUT

BRACKET

FIG. 12

Lock bolt head firmly in place in carriage with plate, star washer and screw

Rotate bolt for minor rod height adjustment.

FIG. 13

With Door closed use tip of Bolt to mark location for Strike

FIG. 14A

Drill 1" hole for strike (minimum depth - 3/4")

FIG. 14B

Attach strike (P/N 103546) to floor or threshold

Drill holes for strike mounting screws and secure strike with screws.
Drill 3/16" hole for plastic anchor.
Drill 5/16" hole for metal anchor.

FIG. 14C
BOTTOM LATCH Testing and Adjustment

Testing
1. Close the door; bolt should drop into the strike as the door moves into the fully closed position.
2. Press the pushpad and open the door. The bottom latch bolt should retract out of the strike and clear the strike by 1/16" to 1/8". Vertical travel of the bolt should be 3/4".
3. Release the pushpad; bolt should remain retracted until the door is closed.

Adjustment
1. If bottom bolt drags the floor or hits edge of strike:
   Loosen bolt retainer in the carriage assembly and pull bolt from carriage. Screw bolt onto bottom rod one or two turns and return it to the carriage. Test door to assure clearance and secure bolt in carriage by tightening bolt retainer plate.

FIRE RATED TOP ROD ONLY (TRO) DOORS

A door locking popper (Detex p/n 101563) is required when a fire door utilizes a top latching mechanism only (TRO). The popper is designed to project a spring loaded bolt into the adjacent frame or door in the event of fire. Detex recommends installing the popper in the edge of the door 12” above the threshold or finished floor. Holes for the popper and plug must be aligned with each other.

NOTE: Door/Frame reinforcement is required where popper and cap plug are to be installed.

103123  Pg 15
STANDARD SURFACE VERTICAL INSTALLATION

1. If metal bottom bolt guard is to be used, do not attach the plastic bottom latch cover (refer to bottom bolt guard installation instructions.)
2. If rod covers are to be used, do not install rod guides (refer to rod cover installation instructions).

Space 1 rod guide equidistant between centercase and latch assemblies (7 foot and 8 foot doors). Use 2 rod guides spaced evenly on the top rod of 10 foot doors.

Attach Top latch cover

8-32 x 1/4" PFH

OR

10-24 x 3/8"

OR

#10 x 1" Self-drilling
