Complete winging and test operation.

STEP 4: Necessary; discard shims not used.

STEP 3: Install switch using 2 provided screws. Route wires as required. Set air gap to 1/8" recommended. Use shims provided for the switch and/or magnet.

STEP 2: Door: Snap cover back in place. Remove magnet cover. Use the 2 provided screws and install magnet on the frame. Mark and drill 2 mounting holes in the door and 2 mounting holes in the frame so that the centerline is located approximately 6 inches from frame stop.

STEP 1: Less than 3/16" THAN 3/16" DO NOT INSTALL CLOSER
