### Checklist Before Starting!!

- **Wide Stile (Surface Strike)**
  - Minimum door stile 6" (152 mm).
  - Template drawings provide door and frame structural and dimensional specifications for door and frame preparation.
  - Surface strike possible. Mortise strike recommended.

- **Doors and frames with walls having a structural thickness (metal skin plus reinforcement, or solid wood) to engage less than (3) full screw threads, are considered unreinforced for hardware.**

- **Unreinforced Doors:** Use Sex Nuts and Bolts.
- **Unreinforced Frames:** Use Blind Rivet Nuts (see sketch).
- Fasteners for unreinforced openings are not supplied by Detex.

- **Reinforced door or frame engages at least (3) screw threads.**

- **Blind Rivet Nut**

---

**Door Must Swing Freely**

**Door Must Not be Warped**

**Door Must Not Bind**

**Door Must Not Sag**

---

**NO MODIFICATION OF ANY KIND, OTHER THAN THOSE DESCRIBED IN THESE INSTRUCTIONS ARE PERMITTED.**

---

- **RHR Door**
- **LHR Door**

---

**Horizontal Reference**

**Finished Floor**

**40"**

**RHR Door Inside Face**

**LHR Door Inside Face**

---

**Mullion Face**

**Stop Face**
**STEP 1: Use template to locate backplate and strike**

**TEMPLATE KEY**
- Circle ☺ = (6) Holes for surface installation
- Square □ = (6) Holes for flush installation
- Triangle △ = (3) Holes for double door installation

1. Use plastic template to mark/drill backplate & strike holes.
2. See text and symbols on plastic template for installation options.
3. RH/R installation shown, reverse all steps for LHR.
4. See page 9 for OKC (03) function.

**SURFACE INSTALLATION**
- Mark (6) back-plate mounting holes *(Mark circles)*
- Mark (2) strike holes

**FLUSH INSTALLATION**
- Mark (6) back-plate mounting holes *(Mark squares)*
- Mark (2) strike holes

For OKC see page 9

Mark centerline for device
40" from finished floor

Mark (4) holes & lines for FLUSH cutout
FOR FLUSH INSTALLATION ONLY
**STEP 2: Drill backplate and strike holes**

**SURFACE & FLUSH INSTALLATIONS**

**BACK-PLATE HOLES**
6 places for 1/4-20 machine screws (#7 or 13/64")
**OR**
#14 self-drilling screws
(1/8 pilot hole)
**OR**
1/4-20 machine screws used with sex bolts
(9/32")

**NOTE:** Sex nuts & socket head cap screws MUST be used with HURRICANE devices.

See OUTSIDE KEY CONTROL (page 9) for transferring hole locations from DEVICE side to TRIM side.

**STRIKE HOLES**
2 places for 1/4-20 machine screws (#7 or 13/64")
**OR**
#14 self-drilling screws
(1/8 pilot hole)

**FOR FLUSH INSTALLATION ONLY**
Remove outlined area

Drill (4)
1/2" diameter holes

Drill 4 marked locations & remove marked rectangular area

Finished FLUSH cutout

**STEP 3: Install back-plate**

See OKC steps, pg 9

Sex nuts and socket head cap screws MUST be used with HURRICANE devices

1/4-20 x 1-9/16"

Install with (4) lockwashers & screws or screws & sex bolts

**STOP:** IF PULL OR TRIM NOT ORDERED, CONTINUE ON TO STEP 4.

Inside PULL, OKC, PULL or TRIM PLATE must be installed before installing device.

1. Inside Pull.................pg 8 (below)
2. Outside Key Control...pg 9
3. Pull and Trim Plate.....pg 10

**INSIDE PULL KIT (IP KIT) (OPTIONAL) (must be installed before installing device)**

**ALIGN** pull with back-plate tab. **MARK** and **DRILL** holes.

**INSTALL** pull with (4) countersink washers & flat head screws

103132 pg 8
Outside Key Control Installation, if required

**SURFACE INSTALLATION**

(Mark circle) ○

Align template with device centerline and mark/drill appropriate OKC hole through door (RHR Shown)

**DEVICE SIDE**

**FLUSH INSTALLATION**

(Mark square) □

**Transfer hole locations from DEVICE side to TRIM side**

Draw horizontal lines from DEVICE side toward TRIM side of door

**OKC option shown**

1-3/8" diameter (inside)

3/4" tailpiece length

Remove key before installing

Rim cylinder plate
P/N: 102638

NOTE:
1. Rim Cylinder not included
2. Collar available: P/N: ECL-1595

**TRIM PLATE option shown**

1/2" diameter (inside)

Remove key before installing

1-3/4" diameter (outside)

3/4" tailpiece length

3/4" tailpiece length

Trim plate shown for reference only

Remove key before installing

Device

Door

NOTE: Hold square in this position to compensate for bevel on door edge

**Remove OKC lockplate on device only if OKC is being installed**

**REQUIRED!**

Remove screw and lockplate on back of center-case for OKC

**REQUIRED!**

Align timing mark on OKC cam to arrow on lockbody

103132  pg 9
**PULL PLATE and TRIM PLATE OUTSIDE INSTALLATION**

1. **DRILL** (2) 3/8” holes through plate at indentations for HURRICANE INSTALLATIONS.

These holes are also recommended on Fire Rated Wood and Unreinforced Hollow Metal Doors.

<table>
<thead>
<tr>
<th>DRILL holes for HURRICANE</th>
<th>Sex Nut p/n: 105209 (6 ea per kit)</th>
</tr>
</thead>
<tbody>
<tr>
<td>LHR or RHR</td>
<td>PREP door for SEX NUTS: DRILL 9/32” hole through INTERIOR door face. DRILL 1/2” hole through EXTERIOR door face.</td>
</tr>
</tbody>
</table>

2. **PRESS** sex nuts into PULL or TRIM PLATE (Pull plate shown)

1/4-20 x 1-3/4”

| OR | HURRICANE shown |

Cylinder collars can be used where needed

**PULL PLATE** shown with cylinder option

**TRIM PLATE** shown with cylinder option

3. **INSTALL** with lockwashers & screws

1/4-20 x 1”

**HURRICANE:**

Sex nuts and socket head cap screws MUST be used with HURRICANE devices.

PULL PLATE installed on exterior of door

103132 pg 10
**STEP 4: INSTALL DEVICE**

- If OKC is used, align cylinder tailpiece to lockbody OKC cam slot.
- **INSERT** alignment tab into back-plate slot.
- **ROTATE** device toward door.
- **SECURE** device with (2) lockwashers & screws OR screws & sex bolts.

**REQUIRED!**

**FAILURE TO INSTALL SCREWS WILL VOID WARRANTY**

**DRILL SIZES:**

1/2 Exterior door face *(With Trim)*

1/4-20 x 1-9/16"

**OR**

3/8 Exterior door face *(Without Trim)*

Sex nuts and socket head cap screws MUST be used with HURRICANE devices.

**DRILL SIZES:**

1/8 pilot hole recommended

**OR**

#7 or 13/64" for threaded hole

9/32" for use with sex bolts

**LEVEL** device before drilling endcap bracket holes.

**INSTALL** endcap screws hand tight.

**INSTALL** with (2) lockwashers & screws OR screws & sex bolts.

**STEP 5: INSTALL ENDCALL**

Sex nuts and socket head cap screws MUST be used with HURRICANE devices.

1/4-20 x 1-9/16"

8-32 x 5/16"
**STEP 6: INSTALL RIM CYLINDER**

**NOTE:**
1. Rim cylinder NOT included.
2. REMOVE cylinder housing from device, then install rim cylinder.
3. REMOVE key before installing cylinder.

**REQUIRED!**
ALIGN arrow on bracket with timing mark on IKC cam

**DO NOT USE A COLLAR**

**STEP 7: INSTALL SIGN**

**INSERT** sign edge into bottom of push-pad and snap into top of push-pad. Slide hand along top edge of push-pad to fully seat sign

Peel and remove tape backing BEFORE installing sign

Edge of sign should be flush with edge of push-pad endcap

**NOTE:** A screwdriver handle, pen, or other small blunt tool can be used to snap/press the sign in.
**STEP 8:** Install Deadbolt Strike - All hardware shown on this page is supplied in the strike kit p/n 103660

### SURFACE INSTALLATION

<table>
<thead>
<tr>
<th>Screw</th>
<th>Fastener Part No.</th>
<th>Drill Bit</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="screw1.png" alt="Screw" /></td>

</tr>
</tbody>
</table>

Fasten strike loosely with (2) of the screws shown above.

**NOTE:** Arrows on strike indicate strike orientation.

**Install two (2) inner screws**

**REQUIRED!**

Complete strike installation with (2) of the screws shown above.

### FLUSH INSTALLATION

<table>
<thead>
<tr>
<th>Screw</th>
<th>Fastener Part No.</th>
<th>Drill Bit</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="screw4.png" alt="Screw" /></td>

</tr>
</tbody>
</table>

Fasten strike loosely with (2) of the screws shown above.

**Adjust strike**

Adjust strike to desired fit. Tighten screws.

Mark (2) remaining holes. Install (2) screws.
2-POINT and 3-POINT INSTALLATION (Top)

Mark & drill top strike and top bolt holes

SURFACE INSTALLATION

FLUSH INSTALLATION

Mark and drill for top bolt bracket

Place both templates on door and align them using surface or flush indicators

ALIGN surface or flush indicator to centerline on top template

(circle for surface)

(square for flush)

Single Door Shown

Mark and drill for top strike

Drill #7 for 1/4-20 machine screws,
OR
Drill 1/8 for #14 self-drilling screws

103132 pg 14
2-POINT and 3-POINT INSTALLATION (Bottom)

Mark & drill bottom strike and bottom bolt holes

SURFACE INSTALLATION

Place both templates on door and align them using surface or flush indicators

ALIGN surface or flush indicator to centerline on bottom template
(circle for surface)
(square for flush)

FLUSH INSTALLATION

Single Door Shown

Mark and drill for bottom strike
TOP STRIKE and TOP BOLT INSTALLATION

NOTE: The top bracket, top bolt and cover are shipped as a unit. Remove cover to access parts.

All hardware shown on this page except the Sex Nuts are supplied in the Top Bolt kit p/n 103693, 103693-1 or 103693-2

STEP A: Install top strike

NOTE: SOCKET HEAD screws must be used for HURRICANE devices

Install top strike with (2) screws

STEP B: Install top bolt bracket & top rod

Countersunk Spacer
P/N: 105661

Push in Pushpad
before installing top rod

SOCKET HEAD screws & sex nuts must be used for HURRICANE devices

1/4-20 x 1-9/16"

Install top strike with (2) screws & spacer as shown above

STEP C: Install top bolt

STEP D: Top bolt adjustment

See page 22 for cutting top rod

COURSE ADJUSTMENT:
Adjust strike engagement by using different holes in bolt.

FINE ADJUSTMENT:
Use thread on top rod to obtain fine adjustment.
1 thread turn = Approximate .050 inches

SEE PAGE 21 for TESTING and ADJUSTMENT

103132 pg 16
**BOTTOM STRIKE and BOTTOM BOLT INSTALLATION**

**NOTE:** The bottom bracket, bottom bolt and cover are shipped as a unit. Remove cover to access parts.

### STEP E: Install bottom strike

Can be ordered as kit p/n 103566

- 10-24 x 1 screws
- p/n 100109

- strike
- p/n 103546

- p/n 102642-6
- Drill 1/4" hole for plastic anchors

dustproof strike Kit
Part no: 101562-9
(Optional-ordered separately)

- 1" hole for strike (min depth - 3/4")

### STEP F: Install bottom bolt bracket

**Hardware included in Bottom Bolt kit (p/n 103693-1)**

<table>
<thead>
<tr>
<th>Screw</th>
<th>Fastener Part No.</th>
<th>Drill Bit</th>
</tr>
</thead>
<tbody>
<tr>
<td>#14 x 1-1/2&quot; PPH</td>
<td>P/N: 103276-65</td>
<td>1/8 pilot hole recommended for self-drilling screws</td>
</tr>
<tr>
<td>#14 x 1-1/2&quot; PPH</td>
<td>P/N: 100980</td>
<td>#7 or 13/64&quot; for threaded hole or 9/32&quot; for use with sex bolts</td>
</tr>
</tbody>
</table>

- 1/4-20 x 1" PPH
- P/N: 105773-7
- 1/4-20 x 1" 3/16 Socket HD

- Install bottom bolt bracket with (2) screws

- 1/4-20 x 1-9/16"

**SOCKET HEAD screws & sex nuts must be used for HURRICANE devices**

**Sex nuts sold separately**

### STEP G: Install bottom rod

**Push in Pushpad**
before installing bottom rod

Screw bottom rod onto threaded rod
7 full turns minimum, then adjust as needed

**CAUTION:** With bottom bolt extended, end of rod MUST NOT be visible when cover is installed (cover not shown)

### STEP H: Install bottom bolt

Place bottom bolt and rod into bracket. Slide the pin through bracket slots, bolt, and rod hole. Insert pin clip.

### STEP I: Bottom Bolt Adjustment

**FINE ADJUSTMENT:**
Use thread on bottom rod to obtain fine adjustment.
1 thread turn = Approximate .050 inches

**COURSE ADJUSTMENT:**
Adjust strike engagement by using different holes in rod.

**SEE PAGE 21 for TESTING and ADJUSTMENT**
TOP and BOTTOM COVER INSTALLATION & ROD GUIDES

Install top cover with screws provided in Top Bolt kit

P/N: 101950-505
8-32 x 5/16" PFH
or
P/N: 100156-104
8-32 x 1/4" PFH

Rod guide (p/n: 103534)

V50 ROD GUIDE KIT (p/n: 104073)

<table>
<thead>
<tr>
<th>P/N</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>103276-41</td>
<td>#10 x 1&quot; PPH</td>
</tr>
<tr>
<td>PP-5183-68</td>
<td>#10 x 1&quot; SMS PPH</td>
</tr>
</tbody>
</table>

NOTE: 1/16 pilot hole recommended
Space 1 rod guide equal distance between centercase and bolt assemblies (7 foot and 8 foot doors). Use 2 rod guides spaced evenly on the top rod of 10 foot doors.

NOTE:
1. If metal bottom bolt guard is to be used, do not attach the plastic bottom bolt cover (refer to bottom bolt guard installation instructions).
2. If rod covers are to be used, do not install rod guides (refer to rod cover installation instructions).

Install bottom cover with screws provided in Bottom Bolt kit

P/N: 101950-505
8-32 x 5/16" PFH
or
P/N: 100156-104
8-32 x 1/4" PFH
Install Battery and Cover

Before installing battery, RETRACT bolt with key
Connect 9V battery

Before installing cover, retract bolt with key

Rotate slightly over retracted bolt while installing cover

Install cover

8-32 x 3/8” PFH

4 cover screws if optional cover lock not ordered

OPTIONAL cover lock

8-32 x 3/8” PFH

2 cover screws if optional cover lock is ordered

Optional cover lock: (If ordered)
Turn cover lock key 4 to 5 turns (CW) to fasten cover
**If gap is larger than 3/8, use flush holes on template (squares)**

Active Leaf:
Align template with door edge

**Active Leaf:**
Mark (6) holes with circled symbols for mounting back-plate**

Inactive Leaf:
Align template with door edge

**Inactive Leaf:**
Mark (3) holes with triangular symbols for mounting double door bracket

OPTIONAL:
Double door strike kit
P/N: DDSK
Bracket p/n 103683

1/4-20 x 5/8" PH

1/4-20 x 1" PH

#14 x 1-1/2" PPH
1/8 pilot hole

#14 x 1-1/4" SMS PPH
1/8 pilot hole
**Operations:** Turn the cylinder key 360 degrees clockwise (CW) to arm the device and lock the door. With the door locked, pushing the bar will unlock the door and sound the alarm. Turn the cylinder key 360 degrees clockwise (CW) to turn off the alarm, lock the door and arm the device.

**Unlocking door with key:** Turn the key 360 degrees counterclockwise (CCW) to unlock the door without setting off the siren.

**Note:** 360 degrees is the cylinder requirement, do not exceed. DO NOT turn past the HOME POSITION.

**Troubleshooting:**

1. **How to remove cover**
   a) Remove cover by unfastening four screws. If a cover lock is provided with cover, insert the cover lock key and turn it counter-clockwise approximately 4-5 complete turns in addition to removing 2 screws in front of cover.

2. **Trouble installing cover:**
   a) No cylinder collar is needed and will cause problems installing cover, remove collar.
   b) The cover needs to rotate slightly over the dead bolt.

3. **Siren does not sound:**
   a) Confirm the 9V battery voltage is good.
   b) Confirm the battery connector and wires are ok.
   c) Remove siren bracket assembly - Check micro-switches - With both switches open, the siren should sound.
   d) For a quick test to check siren, a 9V battery can be connected straight to the red (+) and black (-) wires on the siren.

4. **Key control cylinder (IKC) - Hard to turn (Binding), does not turn:**
   a) Verify the tailpiece is the right length and not bottoming out.
   b) Verify the cylinder cam is timed correctly, see page 12, step 6
   c) Verify the dead bolt or rod bolts are not bottoming out or rubbing on the strike.
   d) Push bar in and release, the bar should spring back out.
   e) Make sure the device back-plate and end mounting bracket are on the same level surface.
   f) Confirm two screws are installed to secure locking mechanism to door, see page 11, step 4.

5. **Two point locking**
   g) Confirm bottom rod connector was removed, see page 19.

6. **5. The unit sounds when the dead bolt is extended:**
   a) Verify the cylinder cam is timed correctly, see page 12, step 6.
   b) Verify the dead bolt or rod bolts are not bottoming out or rubbing on the strike.

7. **7. The alarm does not reset:**
   a) Turn the key 360 degrees clockwise.

7. **The rod adjustments can cause malfunction of the product.**
   a) If the multi-point device is malfunctioning, remove one rod at a time and recheck operations. See rod adjustment operations on page 16 and 17

Call DETEX Technical Support at 1-800-729-3839

**Testing and Adjustment:**

**Testing: (TOP BOLT)**

1. Close the door; turn key (CW) to lock door; bolt should project into the strike cavity and lock securely.
2. Push on the push-pad to open the door. The top bolt should retract from the strike and clear by 1/16" to 1/8".
   - Bolt should remain retracted.
3. Close the door; turn key (CW) to lock door. Bolt should project into strike cavity.

**Adjustment: (TOP BOLT) - Adjust bolt engagement by using holes in top bolt:**

1. If top bolt hits edge of strike when door is opened:
   - Remove clip and pin, move bolt down and insert pin in next lower bolt hole. Insert clip and pin. Test door for bolt clearance.
2. If top bolt does not engage strike:
   - Remove clip and pin, move bolt up and insert pin in next upper bolt hole. Insert clip and pin. Test door for bolt engagement.

**NOTE:** Fine adjustment can be obtained by using thread on bottom rod (1 thread turn = Approx .050 inches)

**Testing: (BOTTOM BOLT)**

1. Close the door; turn key (CW) to lock door; bottom bolt should drop into the strike with door closed.
2. Push on the push-pad to open the door. The bottom bolt should retract from the strike and clear by 1/16" to 1/8".
   - Bolt should remain retracted.
3. Close the door; turn key (CW) to lock door. Bolt should drop into strike.

**Adjustment: (BOTTOM BOLT) - Adjust bolt engagement by using holes in rod:**

1. If bottom bolt drags on the floor or hits edge of strike:
   - Remove clip and pin, move bolt up and insert pin in next upper rod hole. Insert clip and pin. Test door for bolt clearance.
2. If bottom bolt does not engage stroke:
   - Remove clip and pin, move bolt down and insert pin in next lower rod hole. Insert clip and pin. Test door for bolt engagement.

**NOTE:** Fine adjustment can be obtained by using thread on bottom rod (1 thread turn = Approx .050 inches)
Cutting Top Rod (For non-standard doors)

Top rod may require cutting if centerline of device is over 40" from finished floor, or if a non-standard frame is used. To determine top rod length: Measure the distance from the bottom edge of top bolt bracket to the top edge of backplate (XXXX). Add 2-7/8" for the rod length.

DRILL HOLE AFTER CUTTING

Cut portion

Drill hole 13/64"

Modify top rods:
P/N 103674: (7 ft)
P/N 101472-4: (8 ft)
P/N 101472-3: (9-10 ft)
