Door Preparation
(interior door face)

1. Align plastic template to mounting plate

2. Mark mounting plate holes straight through door.

3. Drill 9/32" holes (2 inner marked locations) straight through door.

Door Preparation
(exterior door face)

4. Use 3/8" drill to enlarge 9/32" holes through exterior door face ONLY

Installing the Trim
(Note: Rim device shown for reference only. Refer to device instructions for further detail)

5. Fasten tightly with lockwashers and screws (provided in device hardware kit) thru 2 outer holes in backplate

6. Fasten device and trim plate to door with 1/4-20 screws
